Internships Experience

AK Infopark
Nagercoil

Developed a fully functional web application utilizing React for the front end and Node.js for the back end. The application is designed to describe the main purpose or functionality of your application e-commerce platform.

TechCiti
Bangalore

Developed a dynamic web application using PHP for server-side scripting. The application is designed to describe the main purpose or functionality of your application.

Projects

Online Shopping Site

Fornt-end

1. Plan Your Design: Decide on the layout, colors, fonts, and general look of your website. Sketch some wireframes to visualize it.

2. HTML: Use HTML to structure your web pages. Create elements like headers, footers, product listings, and a shopping cart.

3. CSS: Style your website with CSS to make it visually appealing. This includes layout design, colors, and font styles.

4. JavaScript: Add interactivity with JavaScript. For instance, you can create dynamic product galleries, handle user inputs, and update the shopping cart in real time.

Back End:

1. Set Up a Server: Used a server-side language Java to handle requests and responses. Set up a server to host your website and manage data.

2. Database: Used the database MySQL to store all your product information, user accounts, and order details.

Education

PONJESLY COLLEGE OF ENGINEERING, Nagercoil
Bachelor of Technology
Computer Science
2021-2025

S.L.B GOVERNMENT HIGHER SECONDARY SCHOOL, Nagercoil
SSLC
Computer Science
2019-2021
